Stan Mills, who is the citizen co-coordinator for Rehoboth Beach Neighborhood Watch, said the system will be a good adjunct. Currently, the watch sends emails about recent crime activity and crime prevention.

“The advantage of CodeRED is that its dedicated to emergency notifications needing immediate delivery and receipt,” he said.

Mills has already signed up for the system, and i took less than 30 seconds.

Lynn took the initiative to find and launch the system, Mills said.

Lynn said she wanted to implement the system because she used CodeRED previously when working for Provincetown, Massachusetts, and saw how helpful it was in getting the word out about emergencies.

“This is, I think, a better way to reach as many people as possible,” she said. “Even second home owners who are not necessarily here during the week.”

Right now the city isn’t using social media alerts, but the system leaves the possibility open, she said.

The company has been provided with an initial list of contacts for businesses and residents, but people are still encouraged to self-enroll through the city’s website, www.cityofrehoboth.com. Clicking on a banner on the site will direct a visitor to the enrollment page.

Shippensburg EMS Receives \$87K Grant

By Curtis Garland [Shippensburg \(PA\) News-Chronicle](#)

Shippensburg Area EMS (SAEMS) received an \$87,000 grant from the Federal Emergency Management Agency under the Department of Homeland Security. The company plans to use the grant for Advanced Life Support (ALS) equipment, according to its director of operations, Shawn Hartsock.

The funds were awarded Friday through the Assistance to Firefighters Grant program (AFG). The AFG has helped first responders obtain equipment, protective gear, emergency vehicles and other resources necessary to protect the public and emergency personnel.

County to Apply for Grant for Water Mile Markers

By Jessica Shirey [Gant Daily](#)

CLEARFIELD – Yesterday, the Clearfield County Commissioners approved applying for a \$5,000 mini-grant through the Susquehanna Greenway program for 95 water mile markers for the West Branch of the Susquehanna River.

Since January, the county’s Emergency Management Agency has been called out on five water rescues/searches. The searches involved approximately 20 people, including one fatality, along the river, said Lisa Kovalick, community development specialist.

According to her, Clearfield EMA called upon resources from all over the state during an eight-day water search in May. She said it involved multiple water, land and search rescue teams, the National Guard, the Pennsylvania State Police, fire departments, civil air patrol, R.J. Corman and other private resources. “It occurred in the eastern end of the West Branch, which is the most desolate area with little to no cell phone service,” said Kovalick. She pointed out that Shawville to Karthaus accounts for 63 water miles, and there are only three areas to get on the river.

“By land, search crews were faced with deep forest, steep banks and thick woods. While by water, the river is wide with rapids in the spring. The Moshannon Falls is noted as a caution area on the West Branch.”

The Susquehanna Greenway program has created a sign design guide for municipalities to improve marking water trails, she said. Kovalick noted that Clearfield County currently doesn't have any water mile markers to indicate to local enthusiasts or to tourists their location on the West Branch of the Susquehanna River.

She said that emergency personnel currently cannot communicate their exact location during a search and rescue effort. However, with the grant funding, she said the county EMA will purchase the materials to set water mile markers along the river from Karthaus to Cherry Tree.

According to her, Jerry Pollock, EMA deputy director, will be the coordinator of the grant. She said John Kaskan, GIS director, will assist in marking coordinates for the placement of the water markers and mapping them to upload into the County Control CAD system.

Kovalick also noted that so far, the Karthaus, Girard, Goshen and Curwensville fire departments and the Clearfield, Sandy Township and Curwensville swift water rescue teams have offered to volunteer man hours to install the water marker signs.

Next year Kovalick said a second grant phase will entail water trail orientation; bridge markings; access signs for land-based users; greenway orientation; and interpretive panels. She said the grant will focus solely on safety this year and on tourism and economic development next year.

Emergency-operations drill to be held at Sandusky Middle

By Steve Hardy The Sandusky neighborhood in Lynchburg might look like a disaster scene in a few weeks, but the city will just be running a drill for police, firefighters and paramedics.

The exercise is slated to happen Aug. 6 and 7 between 7 a.m. and 4 p.m. at Sandusky Middle School.

“During the drill, residents and motorists in the area may see emergency response vehicles and personnel moving around the Sandusky community. You may hear shouting, mock gunfire and vehicle sirens in the vicinity of the school building,” according to a city news release.

EMS Director Bill Aldrich has asked media not to share the specific nature of the drill so as not to tip off participants.

Residents in the neighborhood with questions can contact the city Watch Officer, William Perrow, at (434) 455-4289.
