Danville Riverfront Plan

AN AMBITIOUS PLAN TO RECONNECT DANVILLE with the Susquehanna River was unveiled last summer. The Danville Riverfront Plan, being undertaken in conjunction with other economic development activities in the county, seeks to clearly define Danville as the hub of greenway activity on the lower North Branch of the Susquehanna River.

Concurrently, The Montour Area Recreation Commission seeks to establish Montour County as the “Healthiest Place in PA” through a combination of recreation development and programming. The Danville Riverfront project is a logical follow-up to the North Branch Canal Trail Feasibility Study and the Survey of the North Branch Canal Trail Corridor by adding a critical component: defining a clear connection between the North Branch Canal Trail regional trail and Danville’s downtown and neighborhoods. More information is at MontourRec.com.
